

## Specifications

- Supply Voltage: AC 220V 50Hz
- Operating Voltage: DC 24V
- Power: 2.2kW
- Rated Lifting Weight: 1500kg
- Lowest Height: 1200mm
- Highest Height: 1850mm
- Platform Width: 800mm
- Platform Length: 1380mm
- Ascending Time: <30 seconds
- Descending Time: <40 seconds

## Features

- Professional EV battery pack lifting platform
- Ideal for EV battery removal and installation
- Suitable for workshops with limited floor space
- Heavy-duty 1500kg lifting capacity
- Smooth electric lifting and lowering control
- Integrated mechanical safety locking system
- Durable tubular steel construction
- High abrasion and tear resistance design
- Shock absorption buffer for improved stability
- Compact platform suitable for specialised lifting tasks
- Fast lifting and lowering operation
- Designed for safe and efficient EV servicing
