LAUNCH X-431 ADAS PRO+ Deluxe Expansion Package

WE-307010425

The LAUNCH X-431 ADAS PRO+ Deluxe Expansion Package is an ultra-high-precision ADAS calibration solution for passenger vehicles. It supports professional recalibration after cameras, sensors or radar units have been removed, replaced or adjusted.

Its millimetre-level laser rangefinder technology enables accurate forward, backward, left, right and horizontal fine-tuning without repositioning the calibration frame. Technicians can quickly align, parallelise and centralise the system for efficient workshop calibration.

When paired with a compatible LAUNCH X-431 diagnostic tool, the system provides guided calibration for LDW, ACC, RCW, AVM, BSD and NVS systems. It also features electric lifting, manual adjustment and a durable upgraded aluminium-alloy structure.

Features

- Deluxe expansion package for the LAUNCH X-431 ADAS PRO+
- Ultra-high-precision passenger vehicle ADAS calibration
- Millimetre-level laser rangefinder technology
- Supports recalibration after camera, sensor or radar replacement
- Forward and backward fine-tuning
- Left and right fine-tuning
- Horizontal fine-tuning
- Fine-tuning does not require moving the calibration frame
- Parallelising and centralising completed within one minute
- Electric beam lifting
- Manual beam adjustment
- Guided step-by-step calibration through LAUNCH software
- Compatible with selected LAUNCH X-431 diagnostic tools
- Supports LDW, ACC, RCW, AVM, BSD and NVS systems
- Upgraded aluminium-alloy construction
- Detachable tablet stand included
- Compatible with X-431 ADAS MOBILE PLUS targets
- Suitable for professional workshops and ADAS calibration centres

Specifications

- **Product:** LAUNCH X-431 ADAS PRO+ Deluxe Expansion Package
- **Code:** 307010338
- **Application:** Passenger vehicle ADAS calibration
- **Compatibility:** Selected LAUNCH X-431 tools and ADAS MOBILE PLUS targets
- **Construction:** Upgraded aluminium alloy
- **Adjustment:** Electric lifting with manual fine-tuning
- **Measurement:** Millimetre-level laser rangefinder
- **Supported ADAS Systems**
- LDW, ACC, RCW, AVM, BSD and NVS
- **Calibration Functions**
- Forward, backward, left, right and horizontal adjustment
- Parallelising and centralising support
- Electric beam lifting
- Guided calibration through LAUNCH software
- **Package Contents**
- Main frame, transom and plate bracket
- Central rangefinder stand
- 3 laser rangefinders
- Cross-laser instrument
- Target support and height rangefinder
- VW/Audi LDW LAM01-02 target
- 2 wheel clamp kits
- LAC09-01 range target
- Power adapter, activation card and user manual
- **Wheel Clamp Compatibility**
- Audi, Porsche, SEAT, Škoda and Volkswagen
