LAUNCH X-431 ADAS PRO+ Standard Expansion Package

WE-307010388

The LAUNCH X-431 ADAS PRO+ Standard Expansion Package is an ultra-high precision ADAS calibration solution designed for professional passenger vehicle recalibration after sensors, cameras or radars have been removed, replaced or adjusted.

Equipped with millimetre-level laser rangefinder technology, the X-431 ADAS PRO+ supports accurate calibration setup with forward/backward, left/right and horizontal fine-tuning without needing to move the calibration tool. This helps technicians parallelise and centralise the system quickly for professional ADAS calibration work.

The Standard package works with a compatible LAUNCH X-431 diagnostic tool for guided step-by-step calibration and supports multiple ADAS systems including LDW, ACC, RCW, AVM, BSD and NVS. It also features electric lifting, manual adjustment, upgraded aluminium alloy construction and compatibility with X-431 ADAS MOBILE PLUS targets.

Features

- Standard expansion package for LAUNCH X-431 ADAS PRO+
- Ultra-high precision ADAS calibration tool
- Millimetre-level laser rangefinder for accurate measurement
- Designed for passenger vehicle ADAS calibration
- Supports recalibration after sensor or radar replacement
- Multi-directional fine-tuning without moving the calibration tool
- Forward/backward, left/right and horizontal adjustment support
- Parallelising and centralising can be completed within 1 minute
- Electric lifting and manual adjustment
- Compatible with LAUNCH X-431 diagnostic tools
- Guided step-by-step calibration through LAUNCH scan tool software
- Upgraded aluminium alloy construction
- Detachable tablet stand included
- OE standard targets compatible with X-431 ADAS Mobile PLUS
- Supports LDW, ACC, RCW, AVM, BSD and NVS systems
- Suitable for workshops and ADAS calibration centres

Specifications

General Specifications

- **Product:** LAUNCH X-431 ADAS PRO+ Standard Package
- **Application:** Passenger vehicle ADAS calibration
- **Compatibility:** LAUNCH X-431 tools and ADAS MOBILE PLUS targets
- **Construction:** Upgraded aluminium alloy

Supported Systems

- LDW, ACC, RCW, AVM, BSD and NVS

Key Features

- Millimetre-level laser measurement
- Electric lifting and manual adjustment
- Multi-directional fine-tuning
- Parallelising and centralising support
- Guided calibration through LAUNCH software

Package Contents

- Main frame, plate bracket and transom
- Central rangefinder stand
- 3× laser rangefinders
- Cross-laser instrument
- Target support and laser height rangefinder
- VW/Audi LDW LAM01-02 target (307010074)
- 2× wheel clamp kits
- LAC09-01 range target
- Power adapter, activation card and user manual
