

Petrol Stabiliser

Description

Petrol Stabiliser is a modern, ash-free additive mixture that preserves and protects fuel system components. The product has been formulated using state-of-the-art additive and fuel technologies.

Properties

- simple to use
- cost-effective due to exact dosage
- has a lasting effect
- protects fuel against oxidation and aging
- tested for catalytic converters

Technical data

Base	Additiv-Kombination in Trägerflüssigkeit / additive mixture in carrier liquid
Color / appearance	blau / blue
Odor	charakteristisch / characteristic
Density at 15 °C	0,8 g/cm ³
Hazard class as per German VbF	A II
Flash point	+40 °C
Pour point	-45 °C
Viscosity	< 7 mm ² /s
Form	flüssig / liquid

Available pack sizes

250 ml Dispensing bottle 5107
plastic D-F-NL

Our information is based on thorough research and may be considered reliable, although not legally binding.

Areas of application

Added to the fuel of all 2-stroke and 4-stroke gasoline engines. For protecting the engines of decommissioned motorcycles, classic cars and engine-powered garden equipment.

Application

25 ml (added by dosing device) is sufficient to preserve 5 litres of fuel. Before putting into storage, add the appropriate amount to the tank and run the engine for approx. 10 minutes.
