

Automatic filling system for quick and easy filling of tanks. Simply connect the water hose with universal quick coupling, preferably Aqua Stop, then turn the tap and filling stops automatically as soon as the tank is full. Can be retrofitted at any time.

Features

Water supply stops automatically

- Does not need to be monitored
- No overflowing
- Very efficient

Connection on the rear of the machine

- Good accessibility.
- Very convenient

Conventional hose connector

- Easy to use
- Couplings universally available
