

Tire Bright Foam

Description

Tyre Bright Foam has been specially developed for cleaning, treating and protecting tyres as well as enhancing their appearance in one process. Tyre Bright Foam enhances the appearance of weathered tyres by restoring the sheen to the rubber surface.

Properties

- easy to use
- does not contain flammable solvents
- odorless
- cleaning and care

Technical data

Base	Silikonölemulsion, Tenside, Glykole / silicone-oil emulsion, surfactants and glycols
Color / appearance	weiß / white
Density at 20 °C	0,922 g/cm ³ DIN 51757
Propellant	DME, Butan / DME, butane
Flash point	-41 °C
Odor	charakteristisch / characteristic
pH value	7,5
Form	aerosol, flüssig / aerosol, liquid

Available pack sizes

400 ml Can aerosol	1609 D-GB-I-E-P
300 ml Can aerosol	7601 D-RUS-UA

Our information is based on thorough research and may be considered reliable, although not legally binding.

Areas of application

Tyre Bright Foam has been developed for cleaning, treating and protecting tyres.

Application

Shake can vigorously before use. Spray Tyre Bright Foam thinly and evenly onto the surface and allow to act for a few minutes. Rinse off with water if necessary. After treatment is over, test brakes at a moderate speed since any silicone film which may have deposited on the brake discs must be removed for the brakes to operate to optimum effect.
