

Product information

Battery Clamp Grease Spray

PI 9/24/02/2020

Description

Battery Clamp Grease is a special grease in spray form which is compatible with plastics and is formulated for the maintenance and care of motor vehicle electronic systems, particularly the battery terminals and electrical connectors.

Properties

- compatible with plastics
- reduces contact resistance
- good corrosion protection
- prevents leakage currents
- good electronic properties

Available pack sizes

300 ml Can aerosol 3141
D-GB-I-E-P

Technical data

Color / appearance	rot / red
Form	aerosol, flüssig / aerosol, liquid
NLGI number	2 DIN 51818
Dropping point for the solids	100 °C DIN ISO 2176
Worked penetration	265-295 DIN 51804
Operating temperature range	-30 bis +60 / -30 to +60 °C
Emcor corrosion class	0/0 DIN 51802
Density	0,65 g/cm ³
Odor	charakteristisch / characteristic
Flash point	-60 °C

Our information is based on thorough research and may be considered reliable, although not legally binding.

Areas of application

Used especially for battery terminals, connections and plug connectors in vehicle electronic systems.

Application

Clean contaminated components and treat with Battery Clamp Grease. Gently shake spray can before use.

Comment

After application respect airing time of 10 min., before connecting the part to a power supply unit.
