

FEATURES

- This brake fluid tester uses technology via the integrated circuitry to check for the moisture content within the brake fluid by measuring the electrical resistance. The 3 LED lights are used to show if the moisture content is low enough for the acceptable limits.
- The item uses a AAA 1.5Volt battery which is included.
- Green LED = Brake Fluid H₂O < 1.5%
Brake Fluid OK / (Also = Battery OK)
- Yellow LED = Brake Fluid H₂O < 1.5%~3.0%
Low Percentage of Water
Advisory to Change Fluid within 6 months
- Red LED = Brake Fluid H₂O > 3.0%
Brake Fluid Change Required
