

With a water volume of about 900 litres per hour, the HD 9/18-4 Cage Classic is the most powerful high-pressure cleaner in the HD Cage Classic range. This three-phase machine with 4-pole motor is designed for continuous operation and maximum cleaning performance and features a wide range of high-quality, long-lasting components, such as the crankshaft pump with ceramic piston or sophisticated sealing technology. This robust high-pressure cleaner also features a sturdy frame construction for effective protection against external influences. The intelligent operating concept ensures convenient and safe operation. The option to mount the machine on the wall is a practical, work-alleviating feature. In addition, all relevant components are easily accessible and maintenance-friendly.

The long service intervals of the HD 9/18-4 Cage Classic round off the features of this highly reliable and powerful machine.

Features

Long-lasting and reliable

4-pole electric motor. Brass cylinder head and ceramic piston. Reliable crankshaft pump with additional thermostat valve.

Robust and secure

Robust tubular frame construction guarantees optimum protection of the machine. Built-in handles for transport.

Maintenance-friendly

Excellent access to all relevant components. Large water inlet filter for easy servicing.

Versatile

The machine can be attached to the floor or the wall.

Specifications

- Supply voltage (Ph/V/Hz) 3 / 400 / 50
- Flow rate (l/h) 450 - 900
- Inlet temperature (°C) 60
- Working pressure (bar/MPa) 70 - 180 / 7 - 18
- Max. pressure (bar/MPa) 250 / 25
- Connected load (kW) 5,9
- Weight (with accessories) (kg) 52,2
- Weight incl. packaging (kg) 64,6
- Dimensions (L x W x H) (mm) 625 x 500 x 360
