

FEATURES

- Essential for safe, controlled removal of clamps attaching exhaust to manifold.
- Special design provides "leverage" required to expand the strong spring clamps.
- This handy tool removes and replaces the exhaust manifold spring clamp on early Volkswagen models fitted with 4 cylinder water cooled engines.

SPECIFICATIONS

- Length: 6" (150mm)
- Minimum distance: 43mm (O.D)
- Maximum distance: 87mm (O.D)
- Applications: VW, AUDI, Golf, Jetta, Passat
