

Our solvent-based FloorPro Allround Deep Cleaner RM 754 is the ideal cleaning solution for removing polymer and wax coatings from alkali-sensitive floors, such as linoleum floors, and is also suitable for removing coatings from alkali-resistant surfaces, such as PVC floors. FloorPro RM 754 can also be used on ESD floors and is intended for mechanical application with single disc machines and scrubber dryers.

Thanks to its particularly low-foaming formulation, it enables very efficient utilisation of the tank volume and thus extended cleaning applications. pH-neutral when applied, the coating removal agent impresses with excellent material compatibility and is also suitable for use in oil separators.

## Features

- Powerful deep cleaner for removing protective coatings and dirt
- Removes heavy wax and polymer coatings
- Removes oil, grease and mineral contamination
- Can be used anywhere
- Wide range of applications: can be used for all water-resistant, alkali-sensitive (e.g. linoleum) and alkali-resistant (e.g. PVC) surfaces
- Very good material compatibility
- Low pH value in application concentration
- No time-consuming rinsing required
- Also suitable for maintenance cleaning
- High level of user safety and user-friendliness
- Pleasant, fresh citrus scent
- Low-foam formulation

## Specifications

- Packaging size (l) 10
- Packaging unit (piece(s)) 1
- pH 10,5
- Weight incl. packaging (kg) 11,2
