

FEATURES

- The Standard Two-Point Scriber provides multi-faceted scribing solutions for machinists, mechanics and sheet metal workers.
- The aluminum knurled body and dual threaded steel points allow you to customize the tool to the needs of your particular job.
- Use the straight point to mark bend lines for an air conditioning duct, or flip the tool around and use the 90° bend to remove an O-ring from a piece of equipment.
- Great for marking and etching, lifting O-rings and gaskets, and cleaning small grooves.
- Points are made from hardened and ground steel.
- Professional engineering and quality.
- Knurled aluminum handle with internal threading.
- Includes two scribers: 1 Double ended scriber 250mm long and normal metal scriber 175mm long
