

FEATURES

- High-quality magnetic core drilling machines for versatile use. Drill large diameters economically and quickly
- Four variable speed ranges
- 2,000 watts motor
- Max. Magnet holding force of 32,000 N
- Forward / reverse operation
- Spindle mount MK 3
- For core drills with 19 mm Weldon shank
- Stable drill guide due to the long and especially deep mounted quill holder
- Device is earthed and double insulated, making it ideal for the job site
- High magnetic holding force
- The coolant is passed through the drill
- Conversion from core drilling to full drilling in just a few steps
- High quality construction
- Safe and reliable function
