LAUNCH CRT-511

TPMS Diagnostic & Sensor Programming Tool

NWE SKU	MODEL	CATEGORY
WE-321052003	CRT-511	TPMS Diagnostics

PRODUCT OVERVIEW

The LAUNCH CRT-511 is a compact handheld diagnostic tool for tyre pressure monitoring systems. It supports compatible TPMS sensor activation, sensor information checks, programming and vehicle relearn procedures, helping workshops diagnose tyre-pressure warning faults efficiently.

Functions & Applications

Professional TPMS servicing for tyre shops and automotive workshops.

CORE FUNCTIONS

- Activate and identify compatible TPMS sensors.
- Read available tyre-pressure, temperature and sensor-status information.
- Read and clear supported TPMS diagnostic fault codes.
- Program compatible LAUNCH replacement TPMS sensors.
- Perform supported sensor ID matching and relearn procedures.
- Access applicable OBDII/EOBD diagnostic functions.

TECHNICAL DETAILS

SPECIFICATION	DETAILS
Brand	LAUNCH
Model	CRT-511
NWE SKU	WE-321052003
Product category	TPMS diagnostic and programming tool
TPMS frequencies	315MHz / 433MHz
Diagnostic functions	TPMS activation, reading, programming and relearn
Additional functionality	OBDII / EOBD diagnostics
Construction	Handheld diagnostic unit with integrated display and keypad

SUITABLE APPLICATIONS

Tyre fitment centres, automotive service workshops, wheel maintenance departments and technicians working on compatible TPMS-equipped vehicles.
